

## Task of The Week #3-2

Use an equation to solve the following:  
Make sure you define a variable  
Write the equation you need in order to solve for the variable  
Show your steps working backwards-vertically

Kanye West expects to sell 350,000 albums in one week.

a. How many albums will he have to sell every day in order to meet that expectation?

b. West has a personal goal of selling 5 million albums. If he continues to sell albums at the same rate, how long will it take him to achieve that goal? Explain how you made your decision.
